Noolog

CONSENSUS ENGINE FOR TEAMS

Skip meetings.
Commit on time.

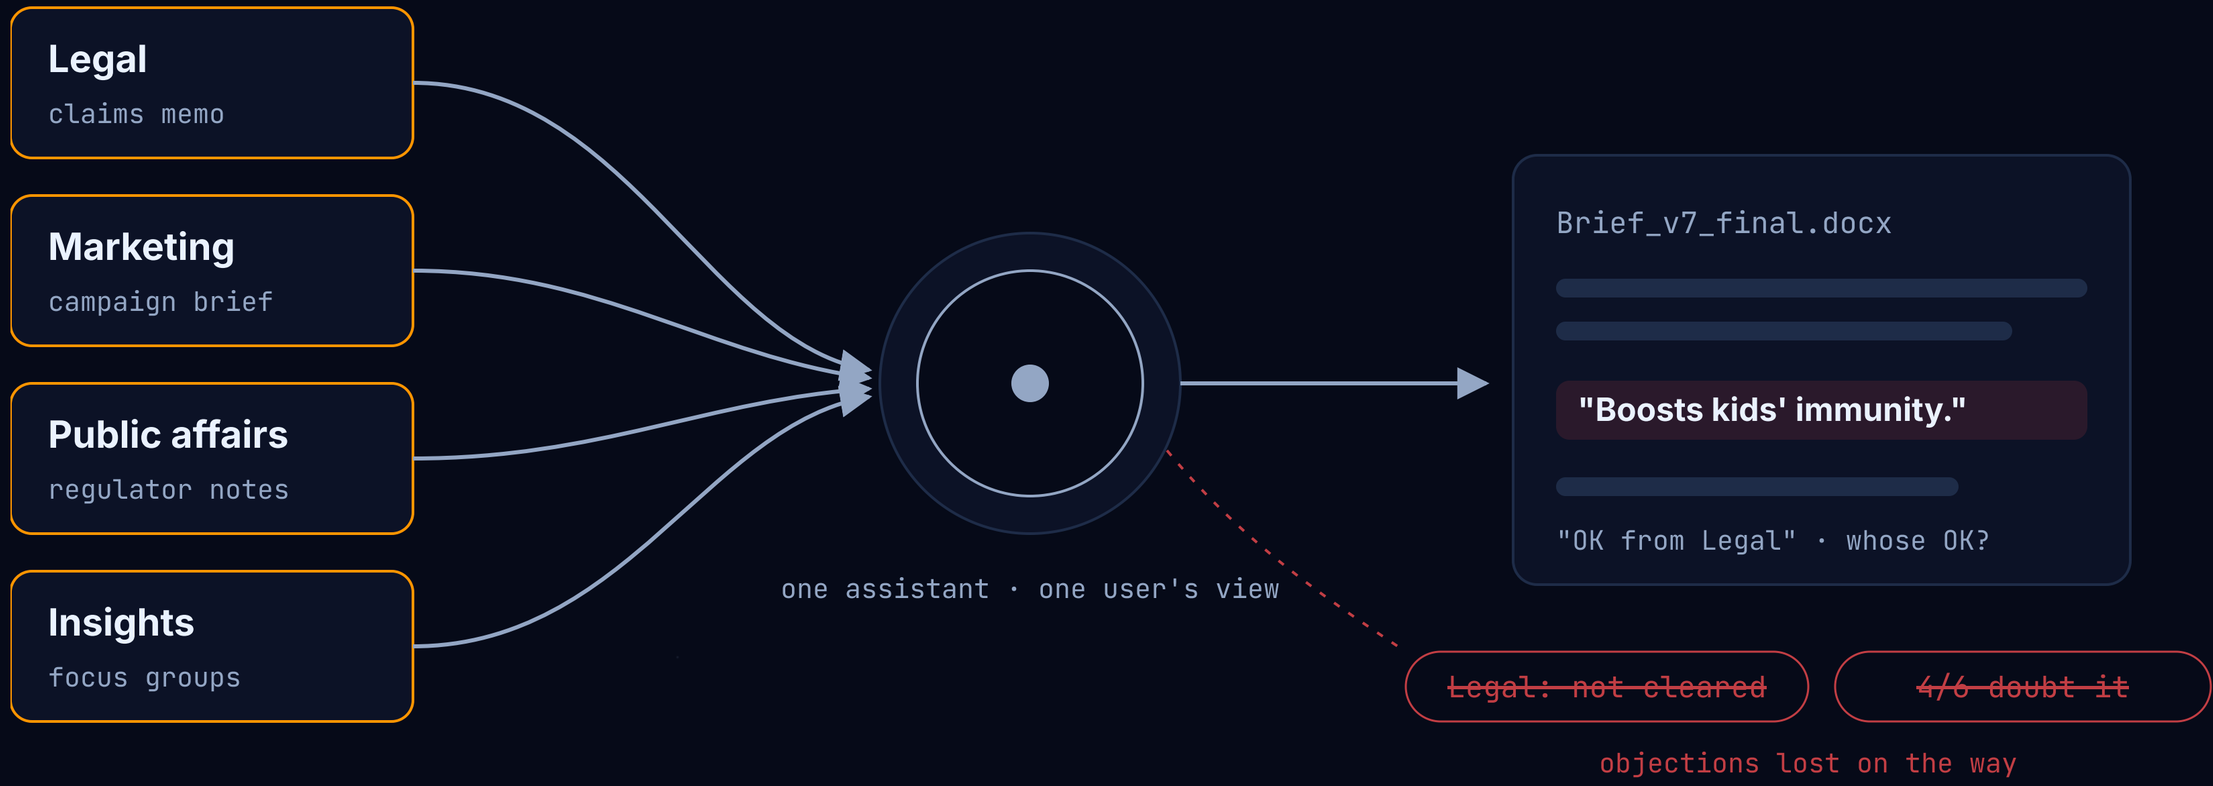

Noolog is a collective intelligence platform that makes teams decision-ready.

noolog.io

THE PROBLEM

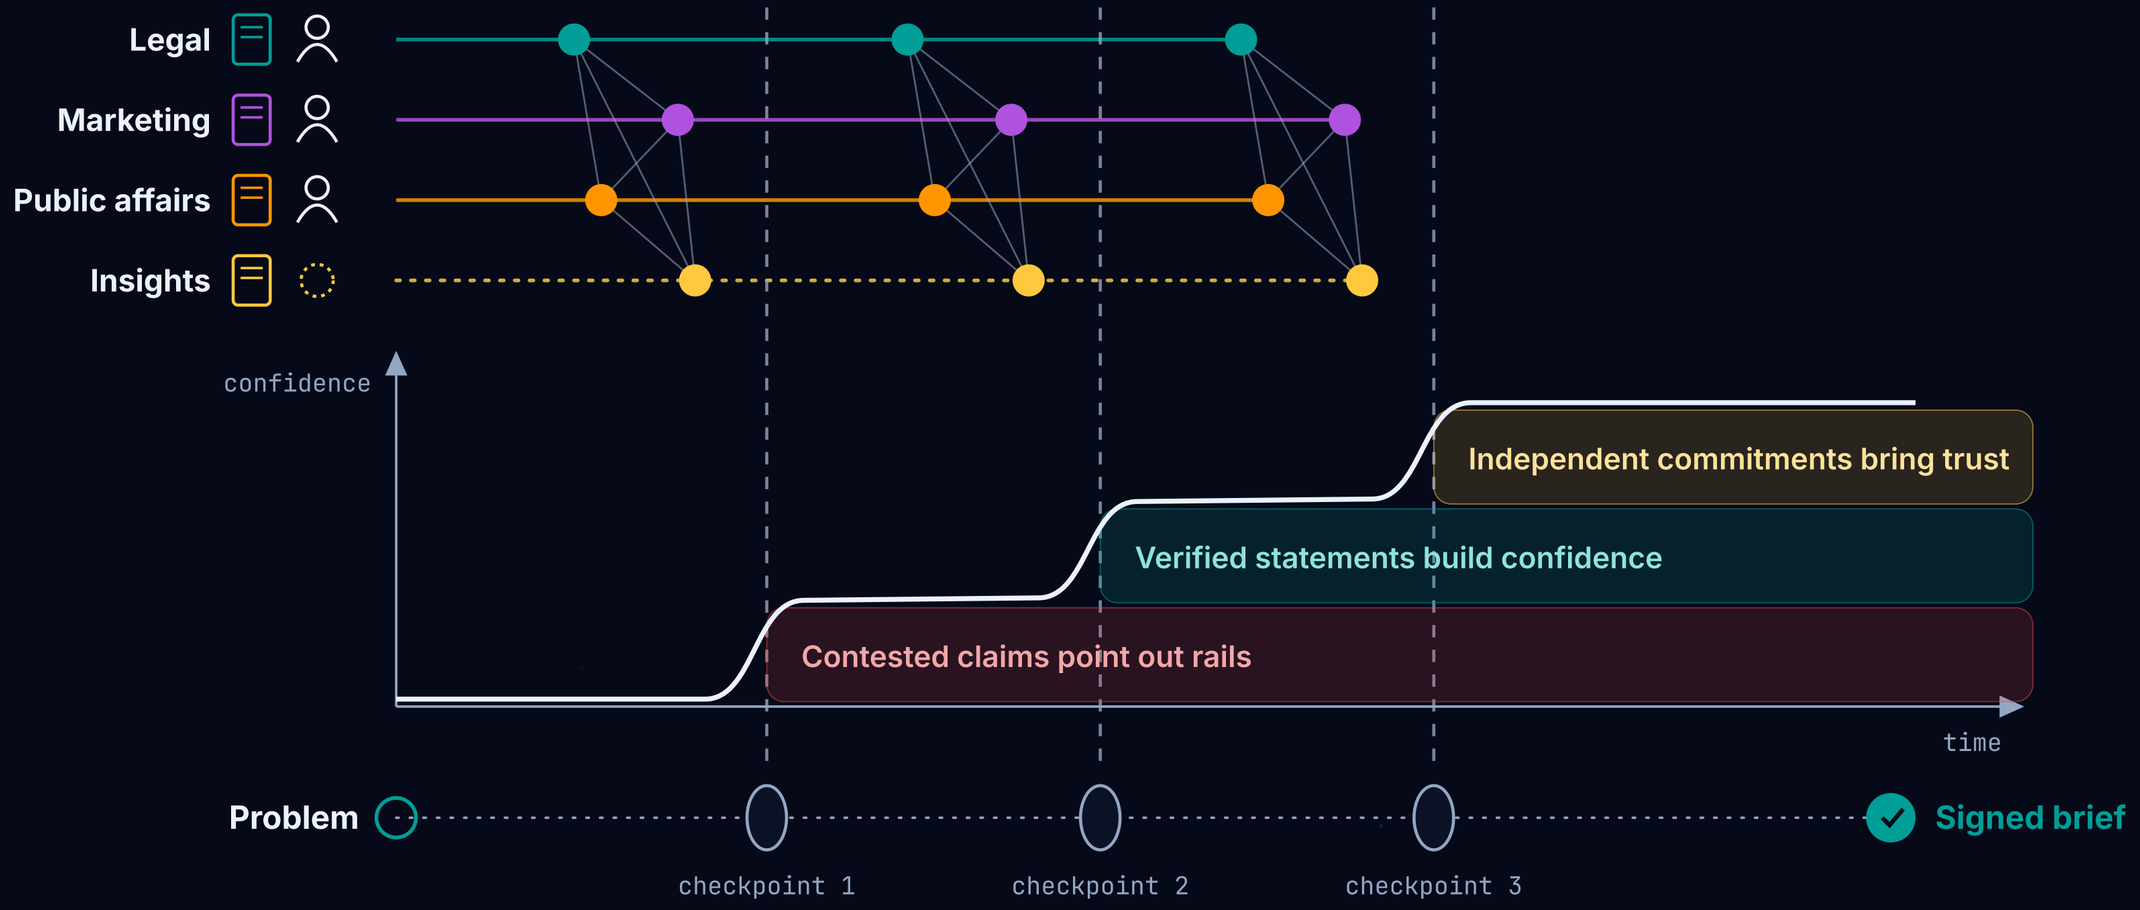

Silos in, sycophancy out. Meetings to fix it.

It averages the silos. The dissent disappears, and so does the evidence.

QUORUM BUILDS CONFIDENCE AND WIPES OUT SYCOPHANCY

Stakeholder avatars run meetings you won't have to attend.

THE DEMO · A REGULATOR MEETING, A PRODUCT HEALTH CLAIM

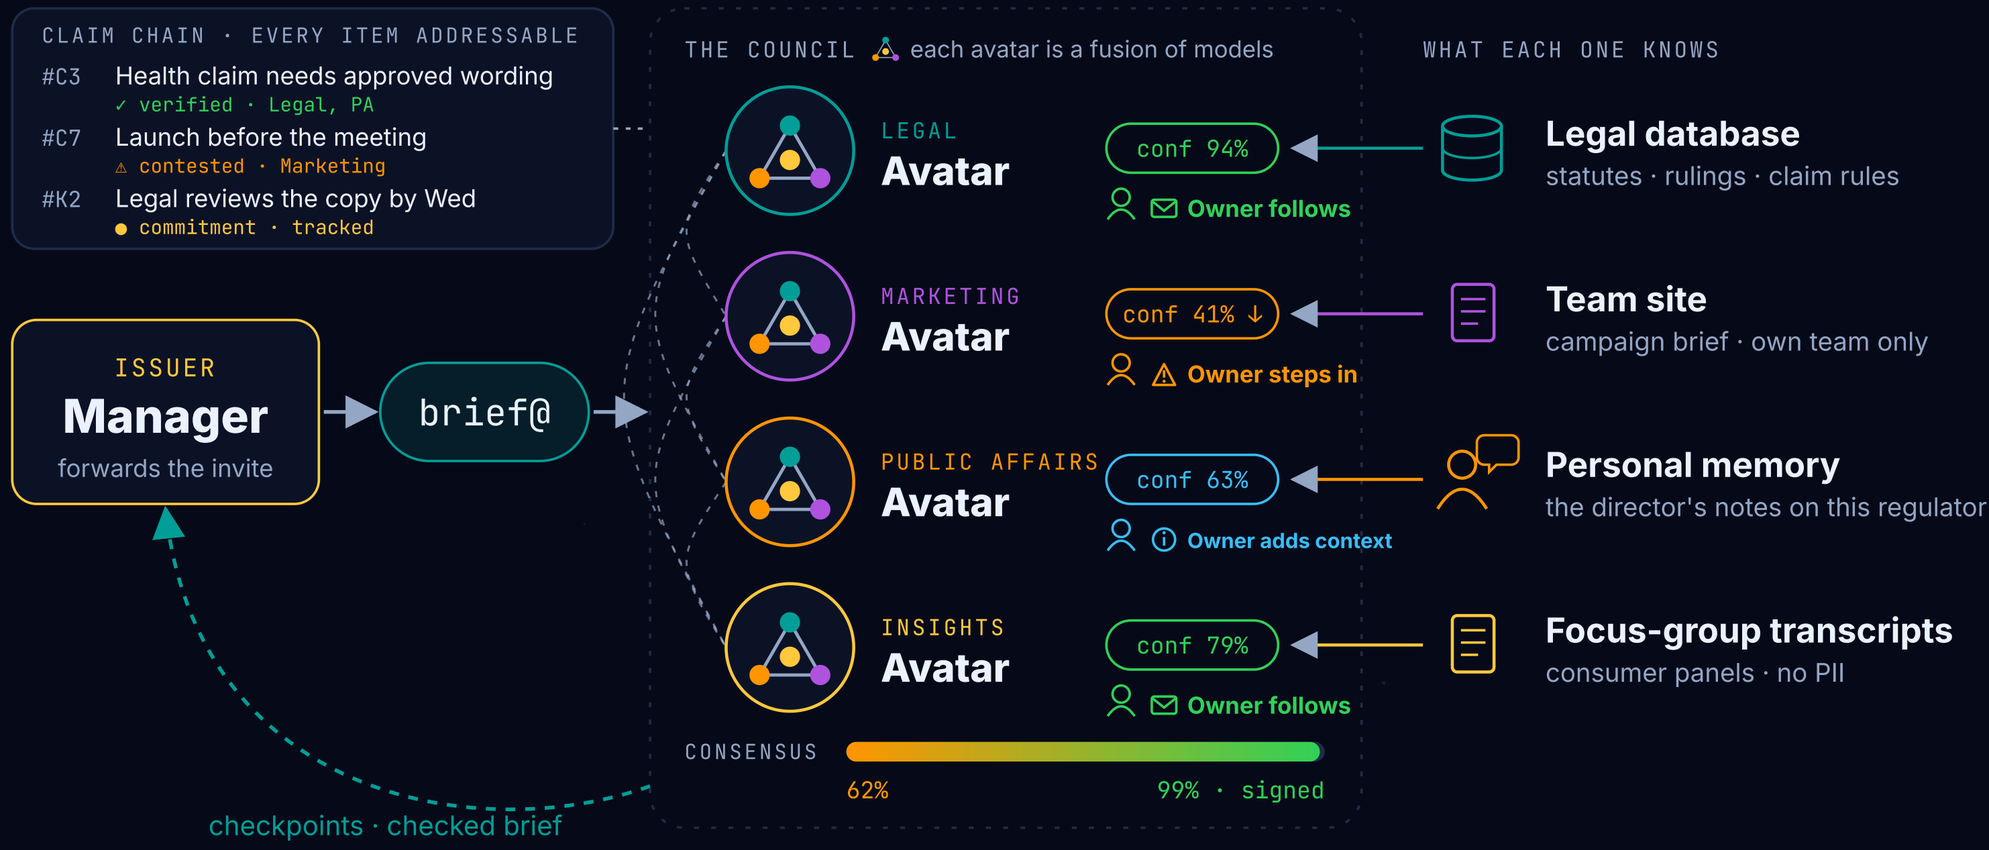

Four inboxes. One brief.

1 **Regulator Monday.** Brief due Thursday.

2 **Knowledge scattered.** Memories, databases, team files.

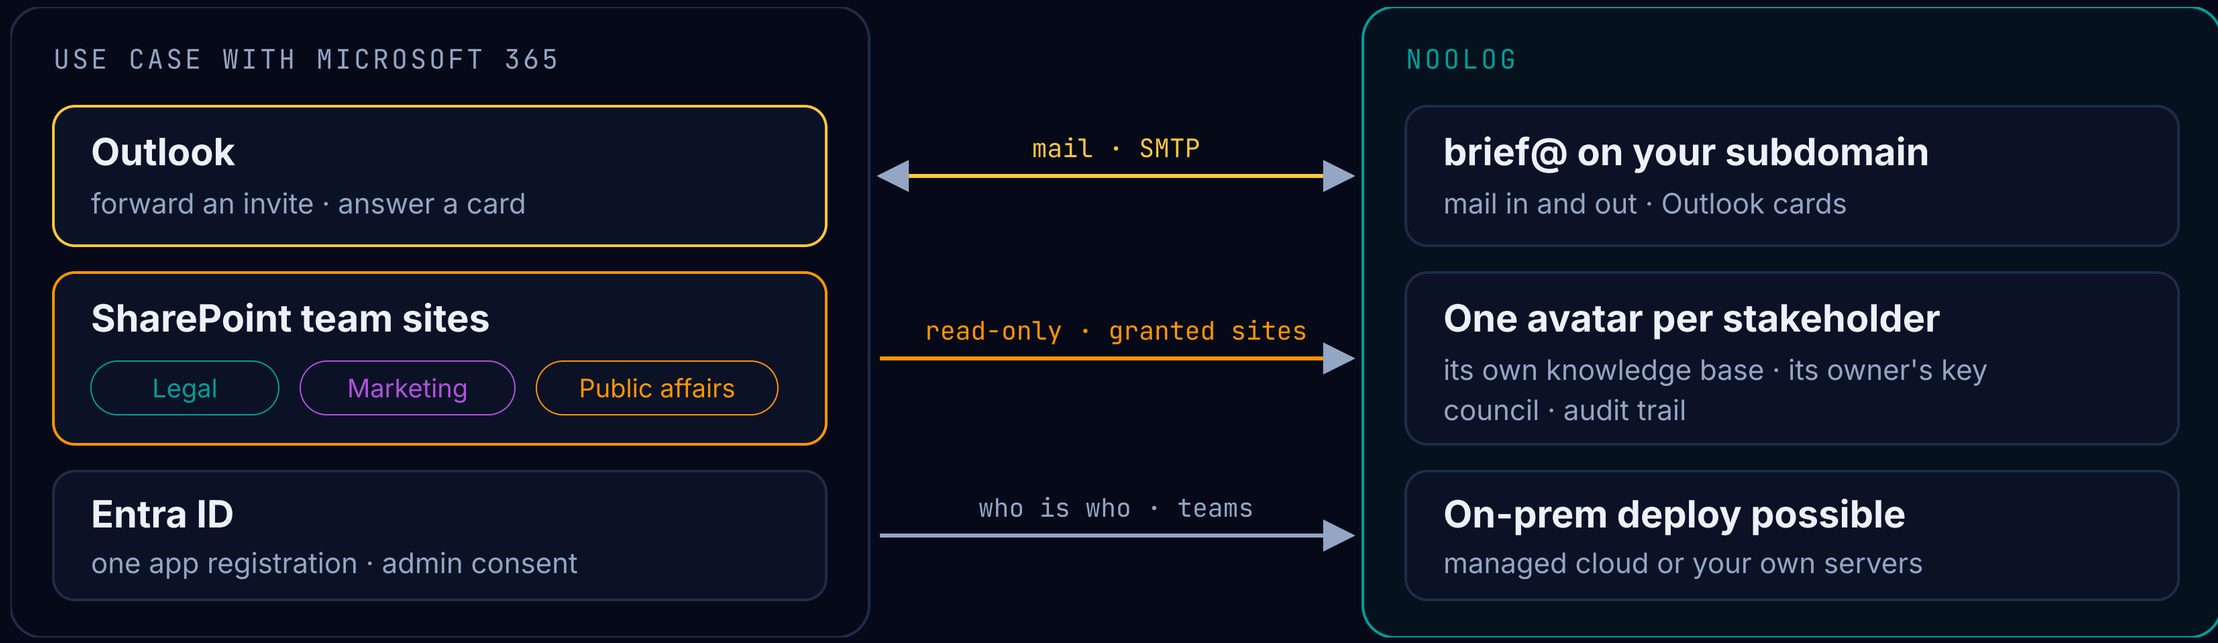

3 **One forwarded invite** to brief@.

4 **People step in** only when confidence falls.

HOW IT PLUGS IN

Just email it.

Customised to your needs and infrastructure.

SEE IT WORK

Nailed sycophancy. Built confidence.

Q Prepare our joint brief for the health ministry meeting on labelling our children's malted drink.

WRONG “Boosts kids' immunity.”

Legal's avatar: not cleared by the claims memo and the advertising rules.

VERIFIED “Vitamins C, D and zinc support normal immune function.”

Composition wording, cleared. Filed by its owner, signed.

CHECKPOINT 1 → 3

62% → 99%

MEETINGS SAVED

6h* 6 days ahead of schedule

FASTER BRIEFS
First draft in seconds
from the forwarded invite

FASTER REPORTING
Audit trail with the brief
who claimed, contested, signed

HOURS SAVED
1.5 h per person per brief
6 h across 4 people*

FASTER HANDOVER
Signed brief by email
avatars release, one sign-off

* 3 checkpoints × a 30-minute call × 4 people · pilot KPIs read from each brief's timestamped job history

NOT ANOTHER ASSISTANT

The governance layer for decisions teams share.
